## DID YOU KNOW?

Whole Woman's Health is an **unlicensed** abortion business that offers ONLY chemical abortions. They do not offer well-woman exams, STI testing, nor contraception.

This business is a danger to our community. Their last health inspection listed 16 violations, including that they:

- **Failed** to have a procedure for communicating with physicians concerning a patient emergency.
- **Failed** to have a policy on the reuse of disposables.
- **Failed** to have a procedure in place to address the reporting of adverse reactions and medication errors.

*plus*

They are currently suing the state to remove laws put in place to protect the health and safety of women such as;

- Licensing and accountability regulations
- Requiring a physician to perform an abortion
- Requiring parental consent and notification of minors seeking an abortion
- Providing informed consent which includes giving women information about other alternatives, and about possible side effects and complications

---

### LEARN MORE

- Visit [www.abortionpillrescue.com](http://www.abortionpillrescue.com) to learn about the dangers of the abortion pill and options if a woman changes her mind.
- Share safer, life-affirming alternatives with your family and friends. See the back of this card or visit [HerMichiana.org](http://HerMichiana.org) for a full list of 200+ local resources.
